

Evolving Holistic Goal/Context for Holistic Management International

Statement of Purpose:

To advance the knowledge and practice of Holistic Management globally.

Quality Of Life

We are supported, stable and secure. We are connected - being part of a just and equitable community; we have a strong sense of belonging and empowerment. We are generous, motivated and creative, inspired and energized because we are making a difference, constantly improving. We are hopeful and respected, feel understood and comfortable in who we are. We value diversity.

Forms of Production/Behaviours & Systems

We create profit/surpluses through good financial planning. We provide fair and equitable compensation/benefits packages for all who work or volunteer for HMI, investing in continued learning and growth.

We are organised, fair and have good time management. We are proactive, fostering a culture of growth, learning and continual improvement. We have a trusting and safe environment. We are progressive, and we collaborate openly and engage freely. We are flexible and observe keenly. We communicate well and create opportunities, building strong, meaningful, honest and open relationships.

We will observe and listen to Nature.

We manage holistically.

Future Resource Base (FRB)

We are knowledgeable, committed, supportive and appreciative of ecological and human diversity - respecting and working with nature. We are organized, observant and successful, with a strong sense of community and integrity. We have financial resilience. We are inclusive, humble, caring and energized. We are creative and fun.

The community is engaged, thriving, innovative and supportive, caring for each other as well as nature. The community is well informed, educated and resourced, valuing diversity and equality.

Our environment has high functioning ecosystem processes with thriving biodiversity - clean clear water, alive healthy covered soils, where natural sounds predominate, the air smells healthy and vibrant.
